Naeem Brown

FRONTEND ENGINEER | UI/UX-FOCUSED DEVELOPER

Cape Town, South Africa · +27 71 345 1241 · naeembrown544@gmail.com · naeembrown.com · linkedin.com/in/naeembrown544 · github.com/NaeemBrown

Professional Summary

Frontend engineer with six years of experience building responsive web applications, internal tools and systems integrations. Delivered more than $5,000 in software cost savings and reduced Largest Contentful Paint from 40 seconds to approximately one second using TypeScript, modern JavaScript frameworks, cloud platforms and user-centred design.

Professional Experience

Systems Engineer | *Pet Plus* — 2025 – Present

- Developed custom internal software that reduced operational costs by more than $5,000 (R82,200).
- Rebuilt the web storefront and configured Cloudflare, reducing Largest Contentful Paint from 40 seconds to approximately one second (97.5%).
- Built financial dashboards for Lightspeed POS and Shopify, plus internal tooling that embeds custom applications in Lightspeed.

Infrastructure Engineer | *Pet Plus* — 2022 – 2025

- Established core IT infrastructure, including internal systems, code repositories and Google Workspace administration.
- Designed and implemented the first automated synchronization between Lightspeed POS and Shopify, keeping inventory and sales data aligned.
- Negotiated partner API access and integrations connecting third-party business systems.

Web & UI/UX Developer | *Freelance* — 2020 – Present

- Designed and developed responsive websites and web applications using Vue, Nuxt, React, TypeScript and Tailwind CSS.
- Translated UX requirements into reusable, developer-friendly interfaces with responsive layouts and full keyboard navigation.

Projects

Legal Dashboard | *Enterprise Legal Tech* — Live Demo

Designed and prototyped a configurable legal case-analysis dashboard with drag-and-resize panels, switchable charts, docked navigation, saved layouts and full keyboard control. Generic names are used for privacy protection.

TOOLS Angular, TypeScript, Vercel

PetPlus Workforce | *for Pet Plus* — petplus-workforce-pwa.vercel.app

Built an installable staff PWA for shift rosters, clock-ins and daily store routines, with Google OAuth 2.0 authentication and Supabase.

TOOLS React, Supabase, Google Sign-In (OAuth 2.0), PWA, Vercel

SIN Esports — sin-esports.com

Developed a WebGL site for a South African esports organisation, featuring team divisions, limited clothing drops and live Twitch embeds.

TOOLS Nuxt, Vue, Three.js (WebGL), GSAP, Twitch embeds, Cloudflare

Chiisai Games — chiisaigames.pixelatedindustries.com

Designed the UI in TresJS and Three.js to create a unique, immersive 3D site where users can browse and pick games to play. Also built a custom desktop environment for the user.

TOOLS Nuxt, Vue, Colyseus (WebSockets), Cloudflare

Skills

DESIGN UI/UX design, user-centred design, responsive web design, interaction design, keyboard accessibility

FRONTEND HTML, CSS, JavaScript, TypeScript, Vue, Nuxt, React, Angular, Tailwind CSS

BACKEND & DATA Supabase, Firebase, SQL, REST APIs, OAuth 2.0, Colyseus, WebSockets, Lightspeed POS, Shopify

LANGUAGES Python, C#, Java, PowerShell, Bash

CLOUD & DEVOPS Cloudflare, Vercel, Netlify, Microsoft Azure, Docker, Git, GitHub

SYSTEMS Windows Server, Microsoft 365, Google Workspace administration, SSO, SAML, OAuth, LDAP
